**August 12, 2015**

**Shelf Life of Canned Fruits and Tomatoes:**

**The shelf life of our canned Fruits and Tomatoes is guaranteed for at least three years, 36 months, when good clean storage conditions are maintained. Product should be stored in a clean, dry storage facility at an optimum temperature of between 40 to 75 degrees. Product stored in hot, damp or humid locations reduce the shelf life.**

**Product stored beyond the three-year shelf life may exhibit some slight change in color, texture and flavor. Canned product is hermetically sealed and thermally processed, providing a safe and tamper evident package.**

A handwritten signature in black ink, appearing to read 'Joe Pirrone', is written in a cursive style.
